PROFILE

Computer Science undergraduate with strong analytical and problem-solving skills in Java, SQL, Python, and Data Structures & Algorithms. Passionate about building AI-powered, data-driven solutions and leveraging technology to solve business challenges through automation, analytics, and scalable software systems.

EDUCATION

B.Tech Computer Science and Engineering Shri Ramdeobaba College of Engineering and Management CGPA: 7.86/10	2023 – 2027
Higher Secondary Certificate (HSC) Tejaswini Junior College Score: 76%	2023
Secondary School Certificate (SSC) Sacred Heart Academy, CBSE Score: 92.4%	2021

PROJECTS

Tata Retail Sales Analytics Dashboard Power BI DAX SQL Excel Data Analytics - Built an interactive Power BI dashboard analyzing 2M+ retail transactions across 50+ stores in 12 countries using Power BI, SQL, and DAX. - Performed RFM customer segmentation, KPI tracking, and revenue analysis to generate actionable business insights.
GitHub Repository Analyzer with AI Spring Boot React GitHub REST API Gemini API Java MySQL - Built a full-stack AI-powered GitHub Repository Analyzer using Spring Boot, React, GitHub REST API, Gemini API, and MySQL to help developers analyze repositories through automated insights and AI-generated summaries. - Developed REST APIs and an interactive analytics dashboard for repository metadata, commits, contributors, and AI-based project summarization.
Robust Ensemble-Based Deepfake Image Detection Using Transfer Learning Python, TensorFlow, PyTorch, OpenCV, CNN, Transfer Learning Research Project - Developed an ensemble-based deep learning system achieving 94.8% accuracy in detecting deepfake, morphing, and image-splicing attacks. - Implemented and integrated ResNet50, Xception, and EfficientNet models using a soft-voting ensemble strategy with confidence thresholding. - Evaluated system performance using precision, recall, F1-score, and ROC-AUC metrics, achieving a 12% improvement in detection precision over the single-model baseline.

INTERNSHIP

AICTE-Edunet Foundation (IBM SkillsBuild) Front End Web Development Intern 6-Week Internship - Developed responsive web applications using HTML, CSS, JavaScript, and modern frontend development practices. - Collaborated in a mentor-guided environment to build, debug, and deliver a functional capstone web application.

TECHNICAL SKILLS

Languages Java, Python, SQL, JavaScript	Frontend React, HTML, CSS	Backend Spring Boot, REST APIs	Database MySQL, Oracle SQL
Tools & Technologies Git, GitHub, Linux, VS Code, IntelliJ IDEA, Power BI, Postman	AI & Data TensorFlow, PyTorch, OpenCV, Pandas, NumPy, Matplotlib	Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks	

CODING PROFILES

- Solved **350+ DSA problems** across LeetCode, HackerRank and CodeChef
- HackerRank: 4-Star Java Rating
- CodeChef: 1255 Rating

ACHIEVEMENTS & PARTICIPATIONS

Smackathon 2025 (National-Level Hackathon Finalist) Red Connect - Developed backend functionality and REST APIs for a real-time blood donation platform within a 24-hour hackathon. - Designed database schemas and collaborated with the team to implement and deliver core application features.
Photography Co-Head (CSE Compusys Committee) Coordinated photography coverage and managed team activities for technical and cultural events.
Graphic Design Member (CDPC RBU) Designed posters, creatives, and promotional content for technical and placement-related activities.
